

Office 365 Email on iPhone (iOS)

Step 1: Install Outlook

The best way to setup Office 365 on iPhone (iOS) is to install the Outlook app.

Open the App Store, search for Outlook, and install it.

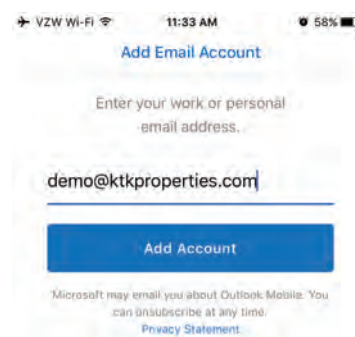

Step 2: Open Outlook

Open Outlook and choose "Get Started". Tap "Notify Me" to make sure you get your push notifications and choose "ok" on the security popup.

Step 3: Enter Email & Password

Enter the email address that corresponds to your Office 365 account, and tap "Add Account". Outlook will redirect you to the Office 365 login page where you'll need to enter your password and tap Sign in.

The experience in the outlook mobile app will be very much like it's desktop equivalent. It gives you access to you're email, calendars, and contacts.
